How wonder it is that nobody need wait a single moment before starting to improve the world - Anne Frank

Student welfare encompasses services that promote the physical, mental and social wellbeing of the students. The services advance the balanced growth and development of the young, foster a culture of caring and positive interaction in the college community, and ensure equal learning opportunities for all. With the help of student welfare, we aim at identifying learning difficulties and other issues early on and intervene in time.

Student welfare aims to create a safe and healthy learning and working environment, protect mental health and prevent exclusion. Student welfare is the responsibility of everyone working in the college community, and it is carried out in collaboration with the parents. It includes student welfare work and services. Student welfare work is the work that all adults in the college community needs to improve the preconditions for learning and to promote wellbeing, health and safety. In short, student welfare means that we look after our students on a daily basis. It is something each and every staff member at our college does as a part of their everyday duties, but different staff members have different roles.

On 20.9.2020 on behalf of the English department we planned to conduct one week bridge Course for all the first year students.
